Picture of our standard small machine 3525

Machine capabilities:

Line pull: **5T** in each part of rope

Rope diameter: **12 mm**

Sheaves diameter: **480 mm**

Number of sheaves per block: **5**

Number of sheave block: **1**

Length of bending section: **1m**

Variable speed: max **4 cycles** per minute

Option: Rope elongation measurement:

PLC system with a flat screen of 15" (friendly interface for operators – recording and displaying of curves during the test)
